

# Markup: HTML Tags and Formatting

## Headings

### Header one

### Header two

### Header three

### Header four

### Header five

### Header six

## Blockquotes

Single line blockquote:

*Stay hungry. Stay foolish.*

Multi line blockquote with a cite reference:

*The **HTML <blockquote> Element** (or HTML Block Quotation Element) indicates that the enclosed text is an extended quotation. Usually, this is rendered visually by indentation (see **Notes** for how to change it). A URL for the source of the quotation may be given using the **cite** attribute, while a text representation of the source can be given using the **<cite>** element.*

*multiple contributors – MDN HTML element reference – blockquote*

# Tables

Employee	Salary	
John Doe	\$1	Because that's all Steve Jobs needed for a salary.
Jane Doe	\$100K	For all the blogging she does.
Fred Bloggs	\$100M	Pictures are worth a thousand words, right? So Jane x 1,000.
Jane Bloggs	\$100B	With hair like that?! Enough said...

## Definition Lists

Definition List Title

Definition list division.

Startup

A startup company or startup is a company or temporary organization designed to search for a repeatable and scalable business model.

#dowork

Coined by Rob Dyrdek and his personal body guard Christopher "Big Black" Boykins, "Do Work" works as a self motivator, to motivating your friends.

Do It Live

I'll let Bill O'Reilly will explain this one.

## Unordered Lists (Nested)

- List item one
  - List item one
    - List item one
    - List item two
    - List item three
    - List item four
  - List item two
  - List item three
  - List item four
- List item two
- List item three

- List item four

## Ordered List (Nested)

8. List item one -start at 8
  1. List item one
    1. List item one -reversed attribute
    2. List item two
    3. List item three
    4. List item four
  2. List item two
  3. List item three
  4. List item four
9. List item two
10. List item three
11. List item four

## HTML Tags

These supported tags come from the WordPress.com code FAQ.

### Address Tag

*1 Infinite Loop  
Cupertino, CA 95014  
United States*

### Anchor Tag (aka. Link)

This is an example of a link.

### Abbreviation Tag

The abbreviation srsly stands for “seriously”.

### Acronym Tag (*deprecated in HTML5*)

The acronym ftw stands for “for the win”.

### Big Tag (*deprecated in HTML5*)

These tests are a big deal, but this tag is no longer supported in HTML5.

## Cite Tag

“Code is poetry.” –*Automattic*

## Code Tag

This tag styles blocks of code.

```
.post-title {  
margin: 0 0 5px;  
font-weight: bold;  
font-size: 38px;  
line-height: 1.2;  
and here's a line of some really, really, really, really long  
text, just to see how it is handled and to find out how it  
overflows;  
}
```

You will learn later on in these tests that `word-wrap: break-word;` will be your best friend.

## Delete Tag

This tag will let you ~~strike out text~~, but this tag is *recommended* supported in HTML5 (use the `<s>` instead).

## Emphasize Tag

The emphasize tag should *italicize text*.

## Horizontal Rule Tag

---

This sentence is following a `<hr />` tag.

## Insert Tag

This tag should denote inserted text.

## Keyboard Tag

This scarcely known tag emulates keyboard text, which is usually styled like the `<code>` tag.

## Preformatted Tag

This tag is for preserving whitespace as typed, such as in poetry or ASCII art.

## The Road Not Taken

*Robert Frost*

Two roads diverged in a yellow wood,  
And sorry I could not travel both  
And be one traveler, long I stood  
And looked down one as far as I could  
To where it bent in the undergrowth;

```
(\_/)  
(='.'=)  
(")_(")
```

Then took the other, as just as fair,  
And having perhaps the better claim,  
Because it was grassy and wanted wear;  
Though as for that the passing there  
Had worn them really about the same,

```
|\_/|  
/ @ @ \  
( > Â° < )  
'>>x<
```
